SUMMARY

Motivated and detail-oriented software engineer with a strong foundation in full-stack development, backend systems, and cloud data engineering. Experienced in developing scalable real-time applications and computer vision systems. Passionate about engineering efficient, production-ready solutions and continuously advancing technical skills.

EDUCATION

KIIT University

Bhubaneswar, Odisha

Bachelor of Technology in Computer Science Engineering | CPI: 7.98

Aug 2022 – May 2026

- **Relevant Coursework:** Data Structures & Algorithms, Web Development, Software Engineering, Operating Systems, Database Management Systems

EXPERIENCE

Software Developer Intern – Backend Developer

Mar 2026 – Present

CodeMythos Solution Startup

Remote / Bhubaneswar, India

- Developed a real-time multiplayer Carrom gaming platform using **Java**, **Spring Boot**, **PostgreSQL**, and **WebSockets** following a Microservices architecture, reducing average response latency by **40%**.
- Implemented core game features including real-time matchmaking, tournament bracket management, AI gameplay engine, and global leaderboard system supporting **500+ concurrent users**.
- Deployed services to **AWS** using **ECR** and **ECS**; handled containerization, database administration, and service orchestration, cutting deployment time by **30%**.

Cloud Data Engineering Intern

Jun 2024 – Jul 2024

Eudskill.Org / KIIT University

Bhubaneswar, India

- Built and deployed **ETL pipelines** using **AWS Glue**, **Lambda**, and **S3** to process both batch and real-time data workloads, handling over **10GB** of data daily.
- Designed scalable **data lakes** and **Amazon Redshift** data warehouses, improving query performance by **35%** through optimized schema design and partitioning strategies.

PROJECTS

Real-Time Image Segmentation for Autonomous Vehicles | Python, PyTorch, ResNet

2024

- Designed and implemented a real-time semantic segmentation system using an **encoder-decoder architecture** with **ResNet**-based residual connections in **PyTorch**.
- Achieved **75% mean IoU (mIoU)** while sustaining **50 FPS**, satisfying real-time performance requirements for autonomous vehicle perception tasks.

Multiplayer Carrom Gaming Platform | Java, Spring Boot, PostgreSQL, WebSockets, AWS

2026

- Architected a scalable microservices-based backend supporting real-time multiplayer gameplay with sub-100ms latency using WebSockets.
- Designed relational schemas in **PostgreSQL** for player profiles, match history, and leaderboard ranking with efficient indexing.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL

Frameworks & Libraries: React.js, Node.js, Spring Boot, PyTorch

Databases: PostgreSQL, MongoDB, Amazon Redshift

Cloud & DevOps: AWS (S3, Lambda, Glue, ECR, ECS, CloudWatch, IAM), Docker, Git, GitHub

Concepts: Data Structures & Algorithms, REST APIs, Microservices, WebSockets, ETL Pipelines

CERTIFICATIONS

AWS Academy Graduate – AWS Academy Data Engineering | Amazon Web Services, 2024

Preparing Data for Analysis with Microsoft Excel | Microsoft / Coursera, 2024
